

Notice

Wash Water to Stormwater

This notice is intended to protect stormwater quality on the Port of Tauranga site by preventing the contamination of stormwater or discharges of contaminants to the harbour via the stormwater network.

Drains on the Port of Tauranga site are intended for stormwater discharge only.

To manage the risk of stormwater contamination or discharges of contaminants to the harbour via the stormwater network and potential environmental impacts as a result, discharge of wash water or other contaminants to stormwater infrastructure on Port land is **not permitted** unless prior arrangements have been agreed with the Port of Tauranga Ltd.

This includes, but is not limited to:

- Washing down of vehicles or equipment
- Cleaning of ground surface, pavements or roadways
- Washing of buildings, walls, roofs, or fittings

If any of your work has the potential to result in wash water or other contaminants discharging to stormwater infrastructure, we ask that you please contact the Port of Tauranga Ltd **prior** to undertaking the work so we can assess the work and agree on best management practices.
